

CFP Filters

ABEK grade Activated carbon filters

UNPARALLELED PROTECTION! CFP Filters - Standard Product Specifications

CFP filters is a ABEK grade activated carbon filters for protection against industrial grade gases from submarines and naval ships. protects against gases and vapors of organic and inorganic compounds as well as against Sulphur dioxide, hydrogen chloride, ammonia and organic ammonia derivatives. It has longer operational range and excellent temperature stability.

Specifications:

Air cleaning Capacity	100, 200 m ³ /hr & 400 m ³ /hr
Air resistance	60 mm of WC. Max.
Shelf Life	3 yrs. Min.

Typical Applications

- Toxic Industrial Chemical removal from submarines and naval ships
- Removal of Ammonia

Features and Benefits

- Wide range of protection against industrial gases
- Designed for longer performance and temperature stability
- Longer operation range and excellent temperature stability
